Academic Visit to VICIB HOMELY PRIVATE LIMITED, PALA

On March 15, 2025, participants of the Walk with a Scholar (WWS) Programme embarked on a field visit to VICIB Homely Private Limited, located in Pala, Kerala, India. VICIB Homely provides individuals with a platform to achieve their financial aspirations by offering opportunities to generate income through product sales and participation in a direct selling system. This initiative allows individuals who are willing to work smart to attain financial independence.

The primary objective of the visit was to provide scholars with practical exposure to community-driven initiatives and socio-economic development projects led by Sandhya. This experiential learning opportunity aligns with the WWS Programme's mission to offer a holistic educational experience that extends beyond conventional classroom instruction.

Following this, the group visited the VICIB Homely food factory, where they observed the processing and packaging of various products, including curry powders and oils. This visit offered valuable insights into food production and quality control measures.

The final stop of the field visit was Ilaveezhappoonchira, a well-known tourist destination, allowing participants to appreciate the natural beauty of the region.

Overall, the field visit provided an enriching experience, combining academic learning with practical exposure to business operations and community development.
